

**Calculating clock and calendar time for an Outcome Harvest
by Ricardo Wilson-Grau**

Step 1. Design of the Outcome Harvest	
Final decisions on harvest users, uses, questions and data collection	# users # harvesters
Harvest guide and format	
Step 2 and 3. Review documentation and draft potential outcomes	# pages of documentation
Email communication or telephone interviews	# sources # outcomes average per source
Step 4. Substantiation	# outcomes to be substantiated
Ensure accuracy and deepen understanding of those outcomes considered most controversial.	Method (virtual, in-person) to be used
Step 5. Analysis and interpretation	
Classification of outcomes	# outcomes
Data base entry	# harvesters
Report writing	
Step 6. Support use of harvest findings	# outcomes
Virtual facilitation of discussion	# harvesters
