

Dashboard Outcome Harvesting

Steff Deprez
17 Sept 2024

Voices That Count is a collaborative network of experts and practitioners who use narrative approaches to understand complex realities within organisations or projects. Through our work we generate actionable insights and stimulate collaboration for social impact.

www.voicesthatcount.net

SenseUs

A narrative pulse for citizen participation, real-time monitoring, story journaling and outcome harvesting

OH Dashboard

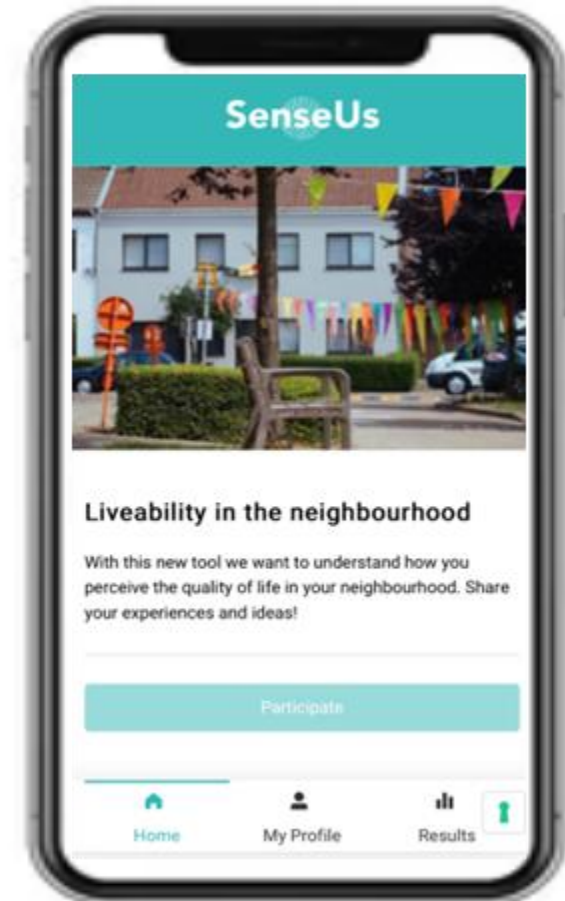

A narrative pulse for citizen participation, real-time monitoring, story journaling and outcome harvesting.

Gather experiences, perceptions or ideas from a dedicated group of respondents, your *human sensor network*

Participants can share lived experiences, outcome stories, pictures, photo stories, suggestions and concrete ideas

Participants get immediate access to the results of the inquiry

VTC Dashboard for Outcome Harvesting

- ✔ Store and present outcome data in a structured way
 - Tailor-made and easy set
 - Online environment (also offline)
 - Based on excel/csv
- ✔ Share results - Making results accessible
 - Different people look for different things
 - Individual login (password protected) for users
 - User-friendly navigation
 - Quick filtering for patterns and selection of outcomes
- ✔ Facilitates analysis and reporting
 - Quick pattern detection across outcomes
 - Export of selected graphs and outcomes

Use of the dashboard within the OH process

Harvesting Process /
Collection Tools

Edit / Fine-tune
Outcomes

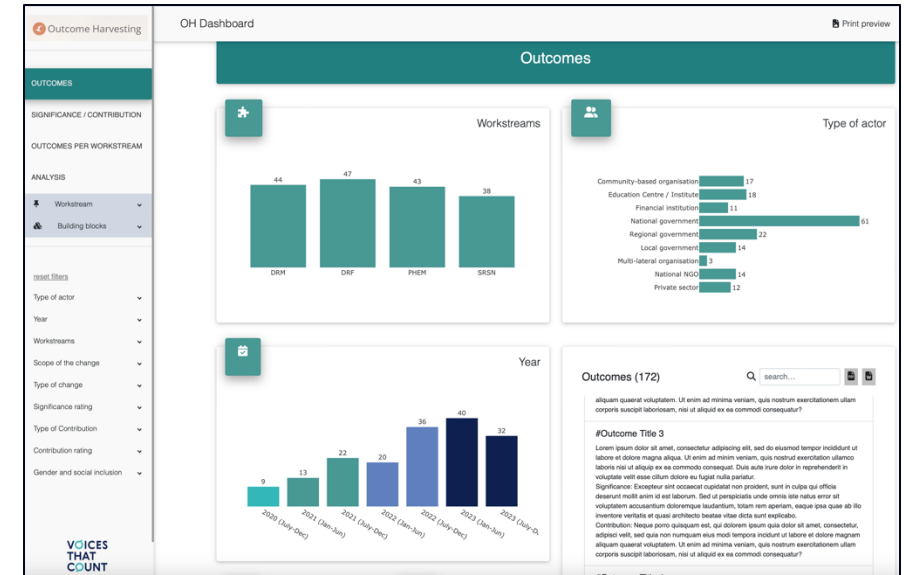

Present / Share / Analyse
Outcomes

csv / excel

Allows collaborative editing
of outcomes

OH Dashboard

Features OH Dashboard

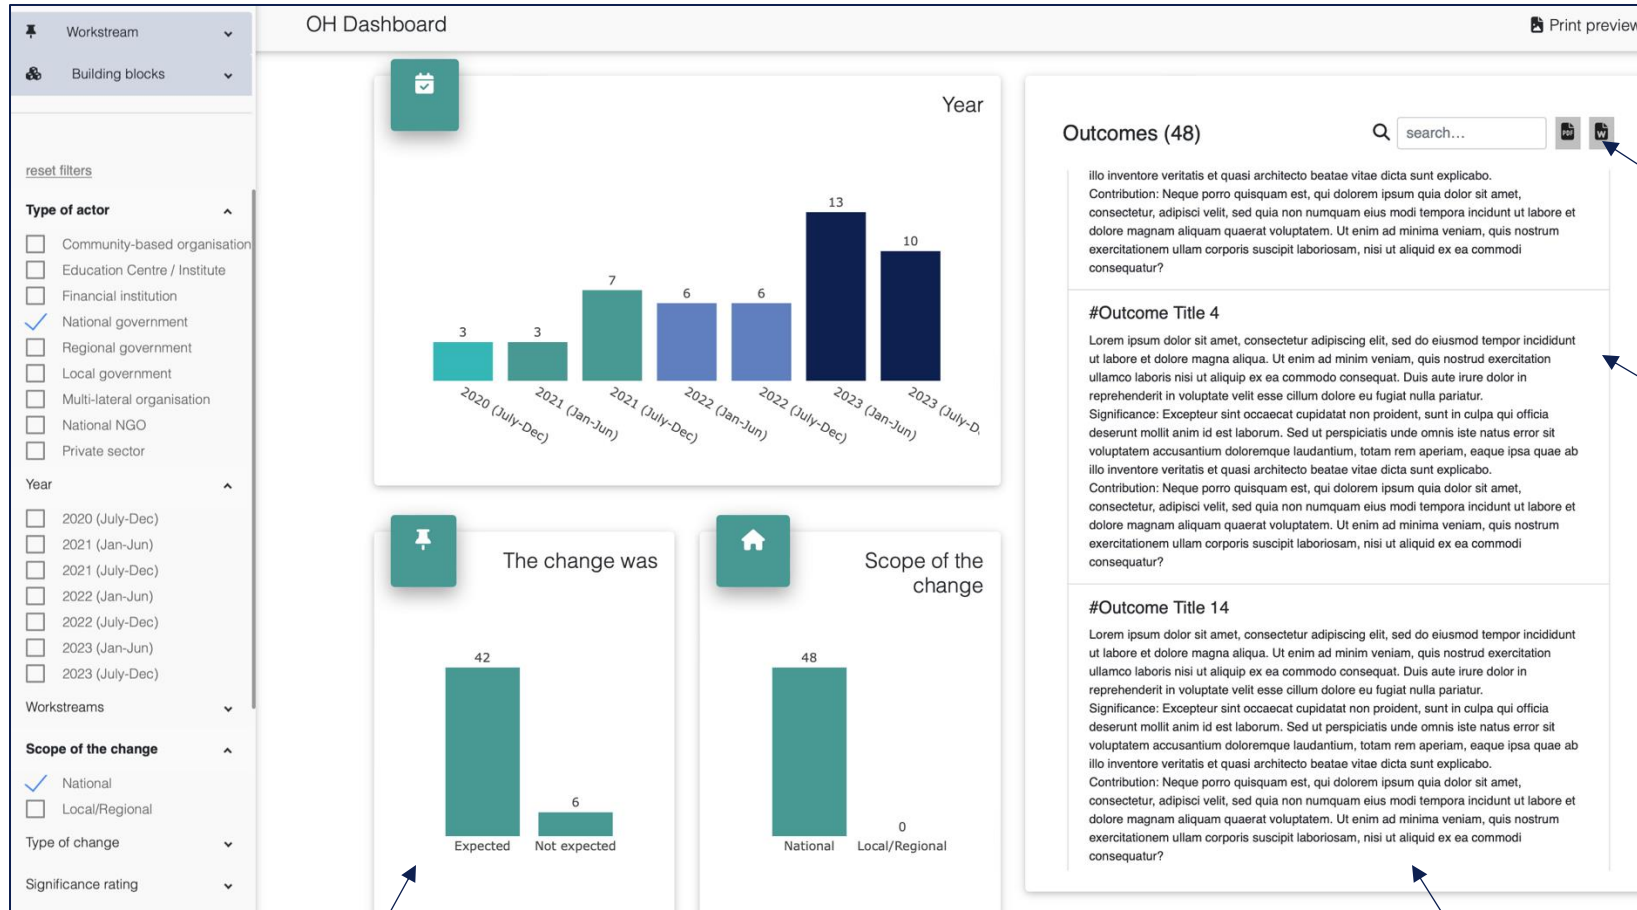

- ✔ Structured overview outcome statements
- ✔ Graphs automatically generated based on outcome taggings
- ✔ Outcome narratives are connected to the graphs
- ✔ Select / export outcomes based on filters
- ✔ Visualise trends over time
- ✔ Main and sub-filter options for multi-layered programmes

Features OH Dashboard

Multi-layered filtering

Combination of filters to look for patterns and select narrative outcomes

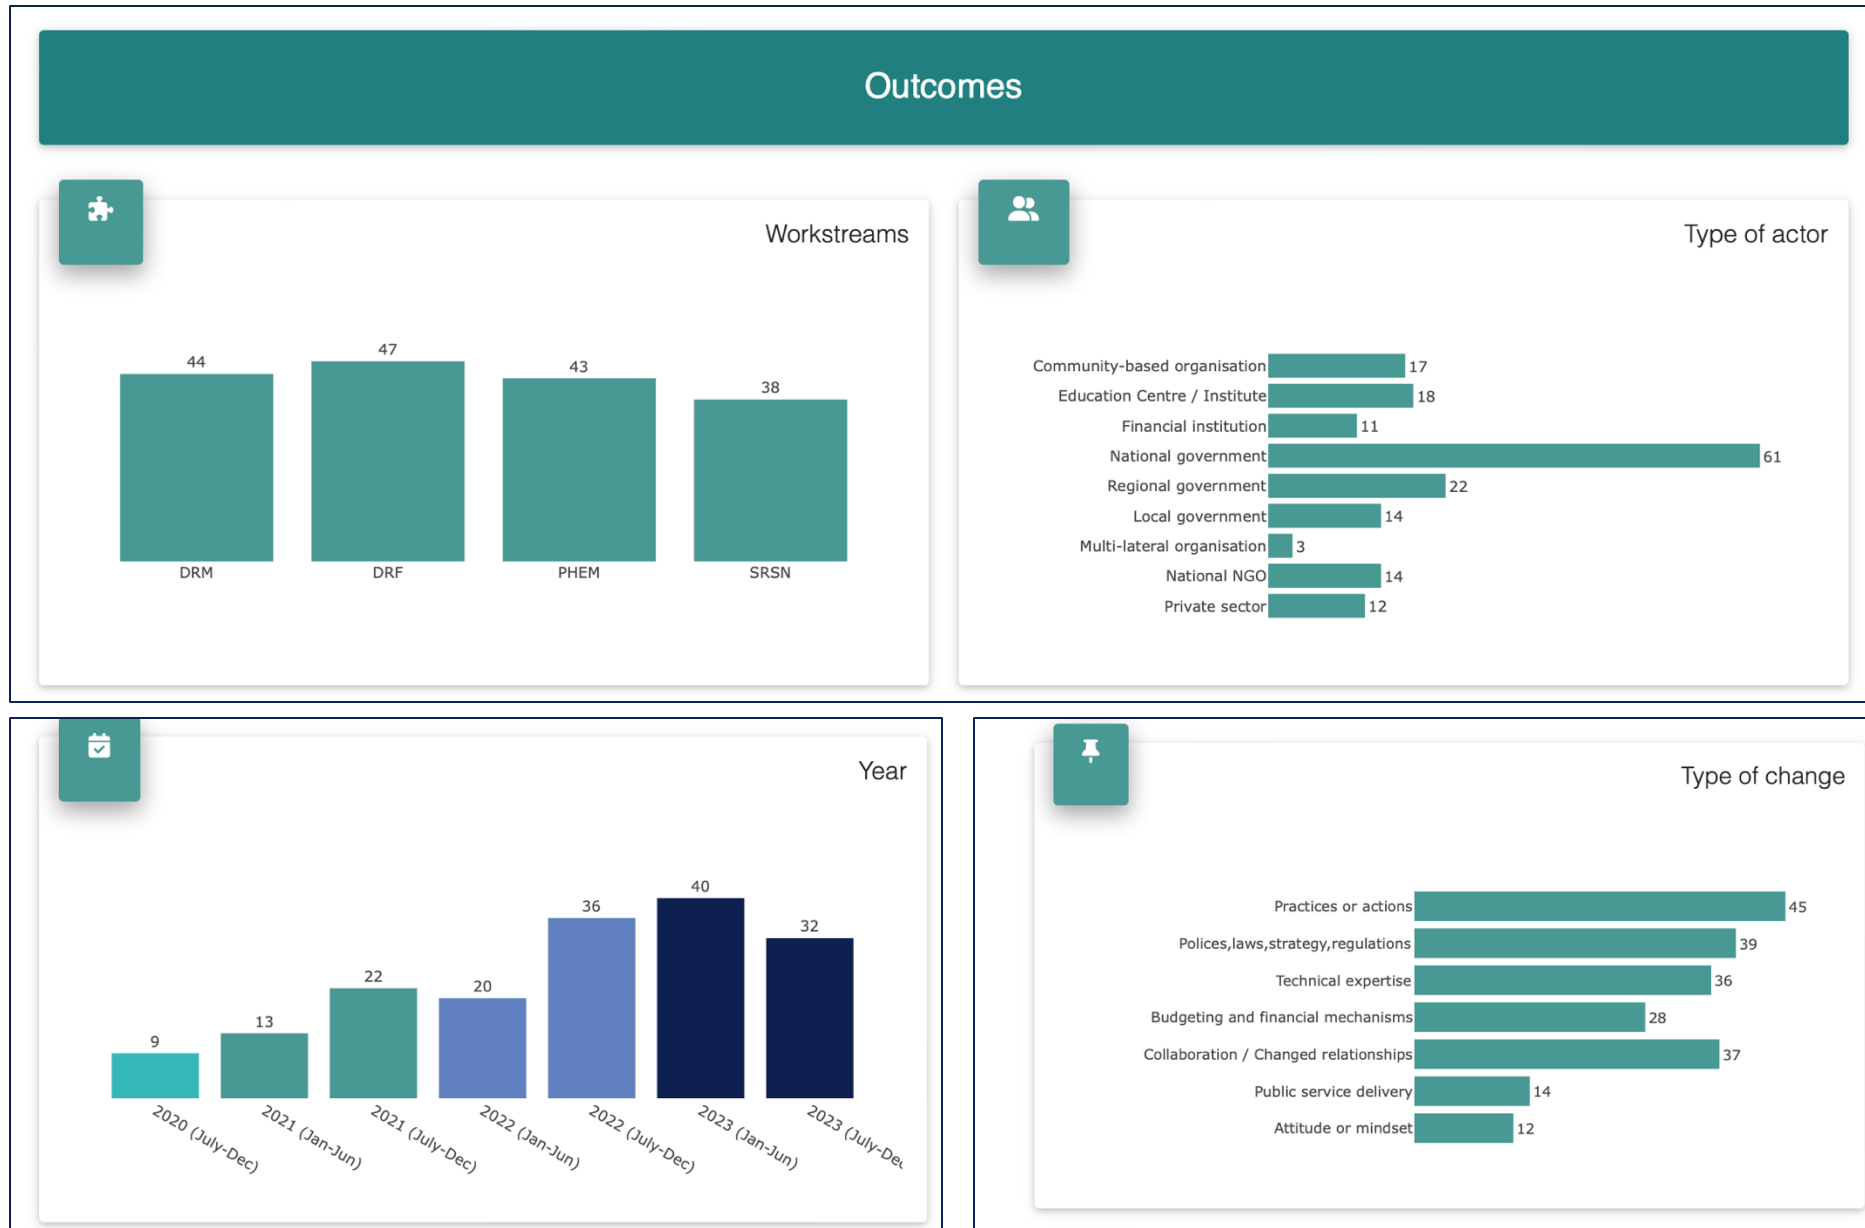

Export of (selected) outcomes in Word and Pdf

Making outcomes accessible for everybody (incl. word search)

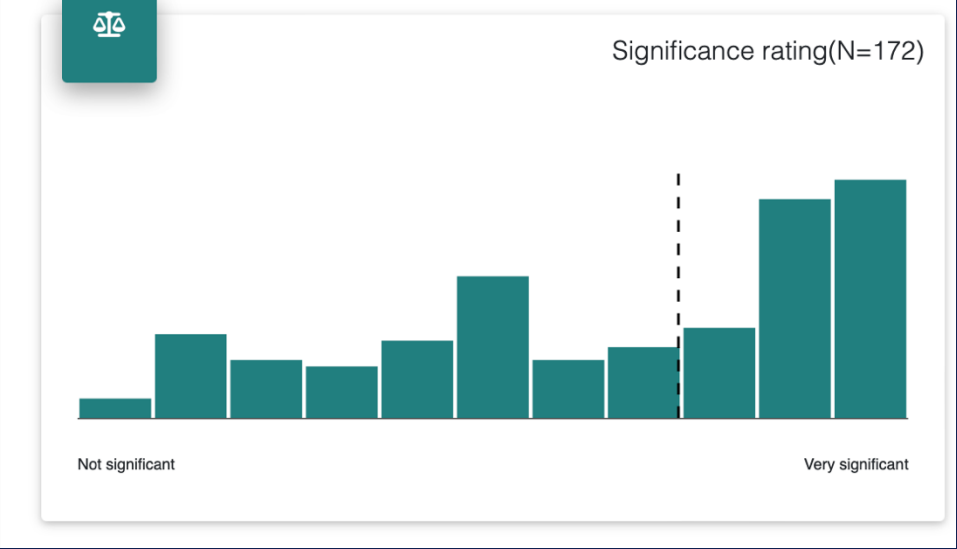

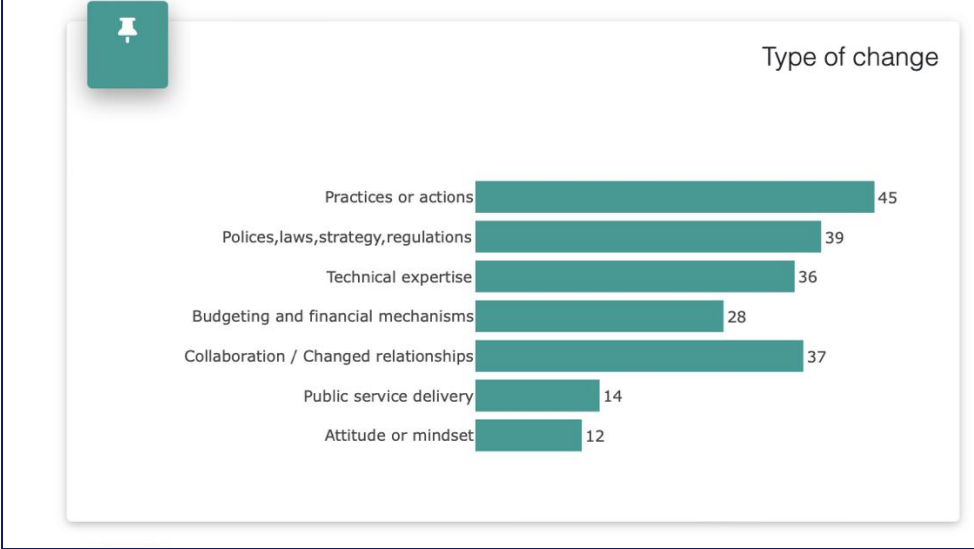

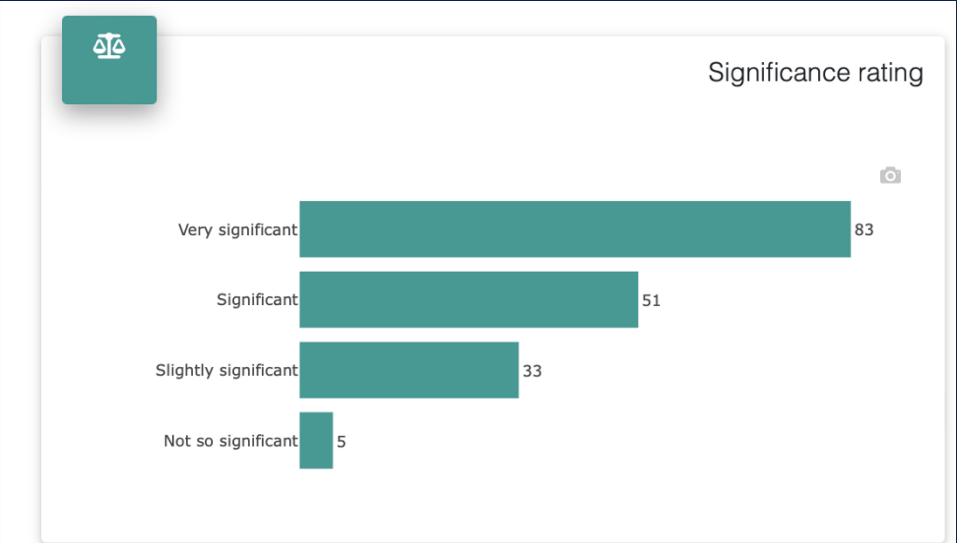

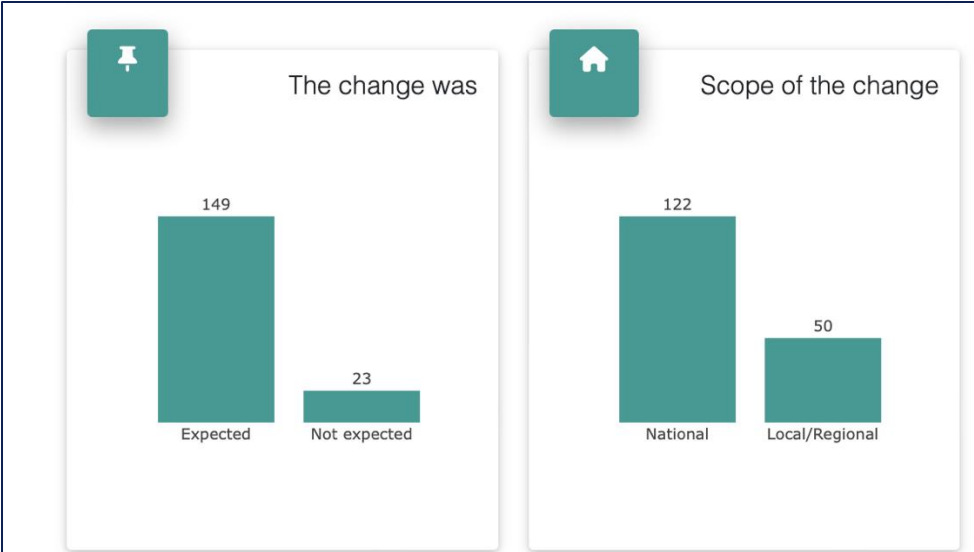

The dashboard visualises all outcome categories / taggings into graphs allowing for easy pattern detection

The narrative outcome statements are connected to the graphs, i.e. the dashboard presents the graphs but also the outcomes behind the graphs

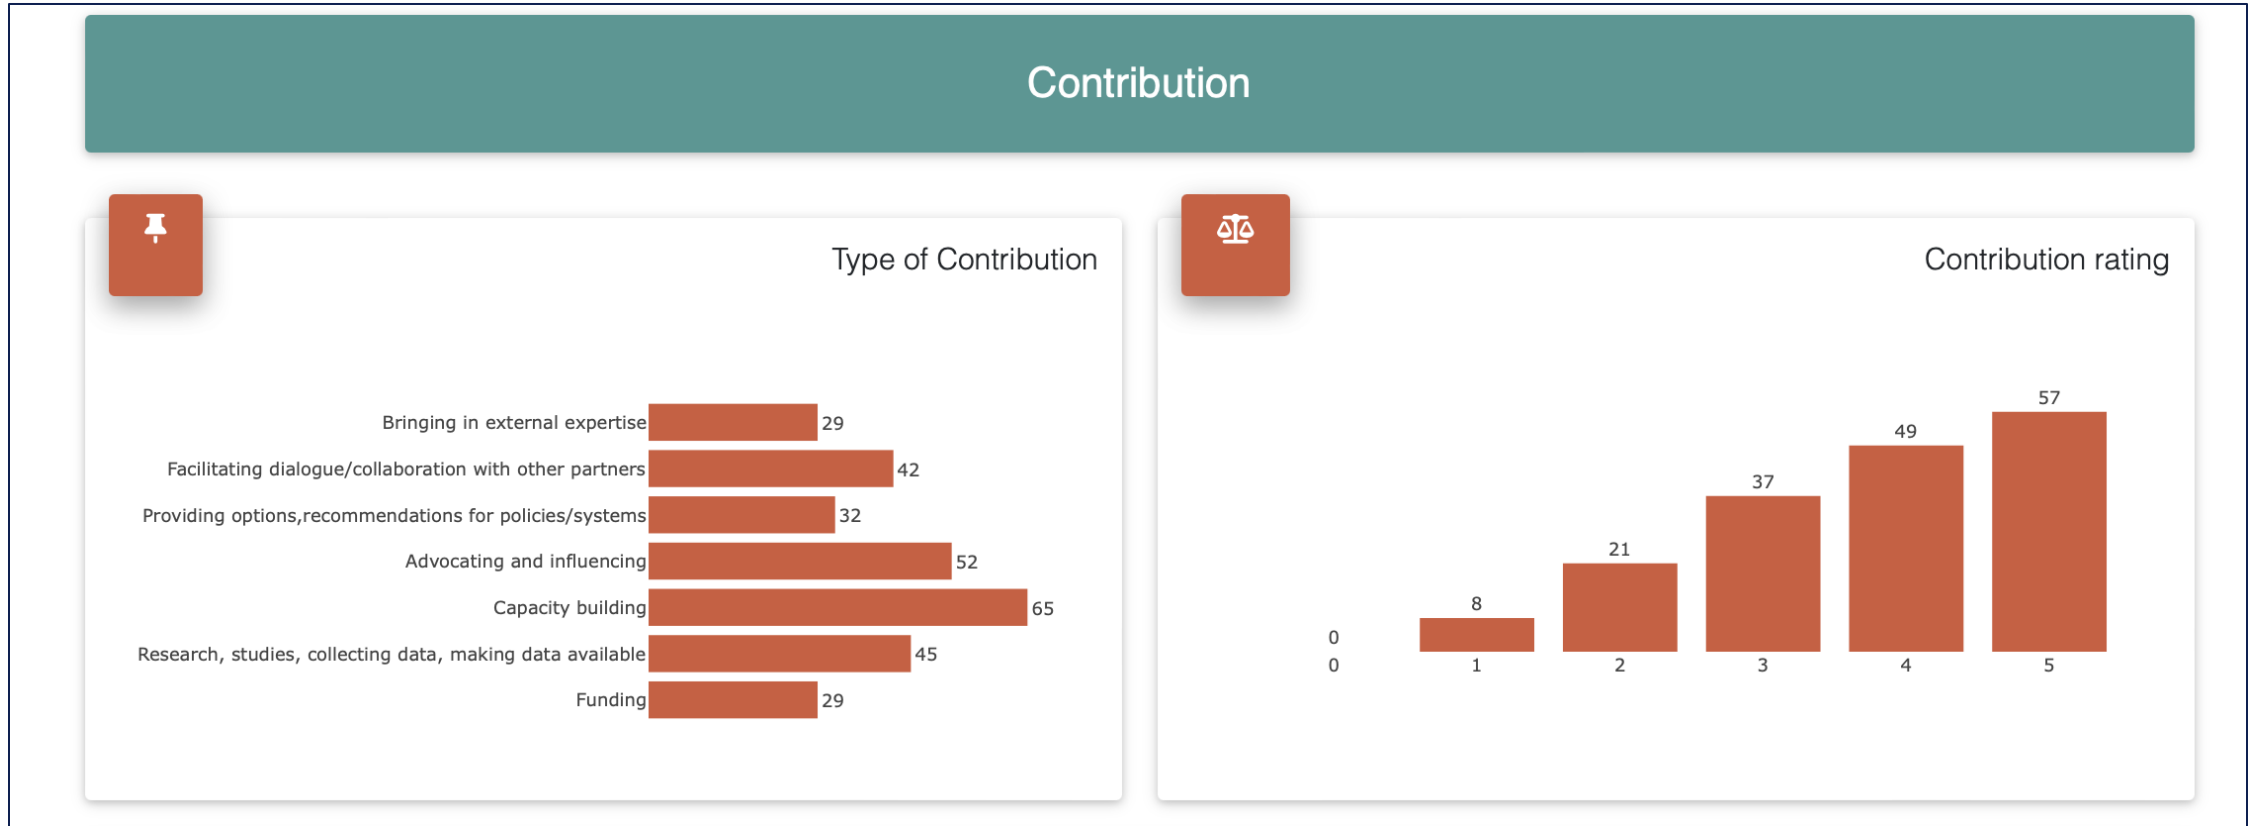

Example visualisations

Example visualisations

Example visualisations

- Each dashboard can be customised to the needs of the OH project

The dashboard is now also available for organisations and programmes using OH
